-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 6) ☐ Other: \_\_\_\_.

## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: References to specific claims (page 8, lines 28-29) are generally not acceptable because the claim content and numbering is often changed during prosecution. In lines 1-3 of page 12, "10" should be changed to "15" and "15" should be changed to "16" to remain consistent with the drawings. Section headings such as "Field of the Invention" and "Brief Description of the Drawings" should be added to the specification.

Appropriate correction is required.

2. Claims 10, 12 and 13 are objected to because of the following informalities: In claims 10 and 13, it is suggested that the recited pressure range be changed to "5 to 200 mbar" because a pressure drop of zero would not be considered to be a pressure drop and would be covered in the independent claim. Such an amendment would be entered in response to this action. In line 2 of claim 12, it appears that "extensions" should be changed to "internals". Appropriate correction is required.

### *Allowable Subject Matter*

3. Claims 1-29 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest a method or device for reducing aerosol-related discharge from a separation column containing separating internals that are segmented at one or more separation points, wherein the separation point(s) being determined such that the aerosols have at least 50% of their maximum particle size at the point, and an at least partially flooded internal at each

Art Unit: 1724

separation point for capturing aerosols. The closest prior art fails to disclose a separation point that is determined as recited and with an at least partially flooded internal at the separation point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed on the attached PTO-892 form disclose scrubbing columns and demisting arrangements.

6. This application is in condition for allowance except for the following formal matters:

The objections to the specification and claims in paragraphs 1 and 2 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
